

PIXELADIES Purse Patterns

Beguiling • Stylish • Inspiring

Bellinzona Cube

Looks small but packs plenty. The unique square design fools the eye with charm. The pattern calls for one outside pocket but feel free to go wild - put pockets on all four sides - inside too! The Bellinzona Cube has a zippered top and is fully lined. The two handles are attached at the top of each corner.

Bermuda Triangle

The clutch has never looked so good, and this one is versatile. The inside, fully lined, is sewn with French seams, so you can actually turn the purse inside out! Try putting different fabrics on each side of the handles and change the look of your Bermuda Triangle simply by putting the handles down on the other side. And, yes, it will still fit your cell phone, brush, lipstick, coin purse, and keys.

\$ 10

The Timbuktu

Don't leave home without it! The Timbuktu can be worn as a backpack, slung over your shoulder, or carried by its handles. The right outside pocket holds your boarding pass, the back zippered pocket fits a U.S. passport, and there is plenty of room for your 3 oz. toiletries, book, camera, and airport-purchased water bottle. Now is the time to brighten up your bag with sparkly specialty zippers.

\$ 10

3 Yamaguchi Totes

Finally, a practical yet easy-to-sew tote bag. It has a top that closes, so you won't lose your stuff! The pattern includes instructions for an outside pocket, but since the Yamaguchi Tote begins with two rectangles, it is the perfect canvas for your creative journeys. With three different sizes to choose from, you can sew a different one for every mood. Give your mother-daughter ensemble that final touch!
